AIRSTRIP®

AirStrip® Insight

Empowering Clinicians with Actionable Insights

AirStrip Insight is a single, intuitive dashboard designed to provide complete clinical context, empowering healthcare teams to identify and prioritize patients requiring immediate intervention. Featuring color-coded data and configurable clinical protocols, Insight streamlines workflows and ensures adherence to digital standards of care.

Patient Surveillance View

Get a 360-degree view of a patient's clinical status. Automated protocol management and visual cues help healthcare teams prioritize patient assessments and interventions.

- Displays a complete clinical picture.
- Complies with unit-specific standards of care.
- Helps reduce avoidable escalations by supporting timely interventions.

Req-017644– Insight Brochure – 2025-01-23;
AirStrip® is a registered trademark of AirStrip Technologies, Inc. and/or its subsidiaries.

2

Unit Surveillance View

Monitor the health of all patients within a unit at a glance. The unit view allows clinicians to filter patients based on specific priorities like sepsis, ventilation, foley and central line management, and national early warning scores (NEWS).
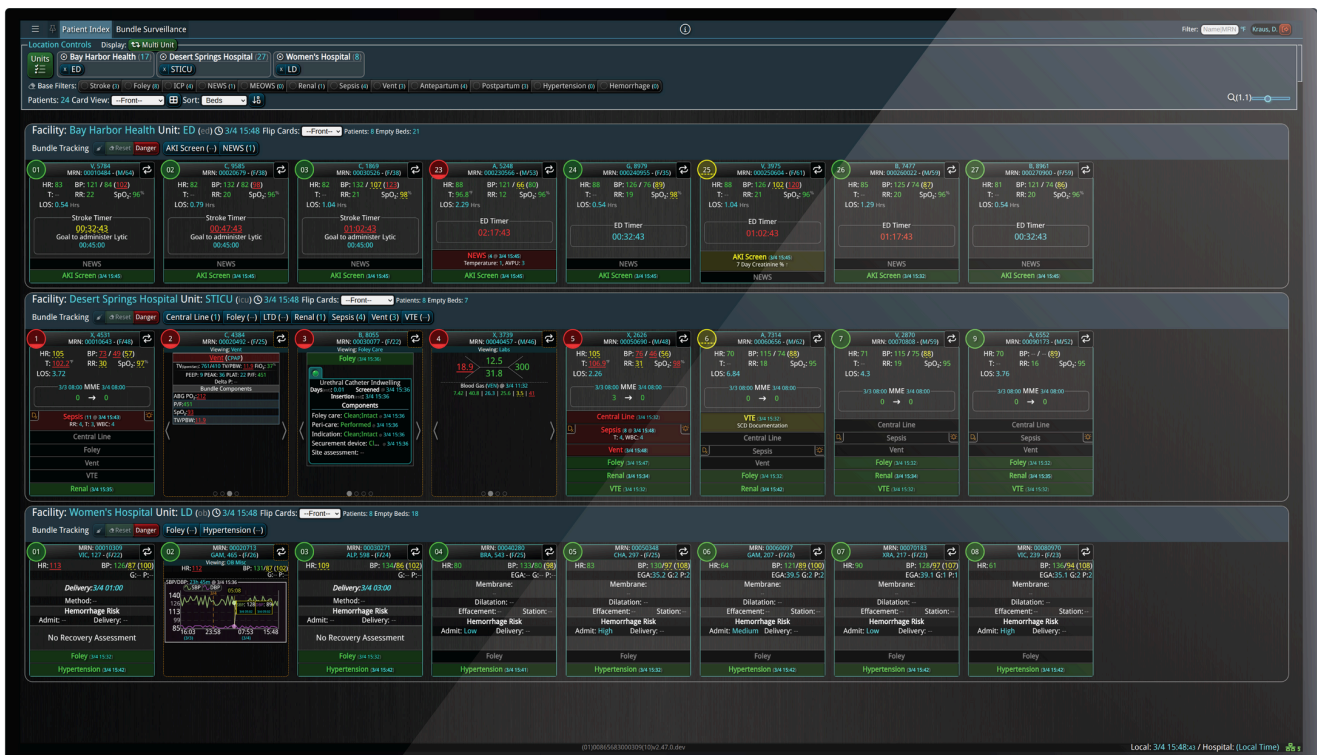

- Highlights patient tiles requiring urgent attention.
- Supports compliance with unit-specific protocols.
- Provides a seamless transition from unit-wide monitoring to individual patient details.

3

Facility View

Manage critical patients across the entire hospital system with confidence. Customize thresholds for early warning score alerts based on patient populations and hospital protocols.

- Offers a system-wide view of critical patients.
- Dynamically adjusts early warning score thresholds.
- Reduces risk through proactive system-level monitoring.

AirStrip Insight Digital Protocols

The true power of Insight lies in its digitized, peer-reviewed protocols and care bundles, customizable for each unit across the hospital.

Intensive Care

- Ventilator, VAP & ARDS Management
- Sepsis Screening and Management
- Acute Kidney Injury Prevention
- Central Line and Foley Care Compliance
- Vasoplegia Management
- Morphine Milligram Equivalents

Labor and Delivery

- Maternal Early Warning Score
- Gestational Hypertension
- Postpartum Hemorrhage
- Sepsis Screening and Management
- Labor Induction Management
- Magnesium Management

Rapid Response

- Sepsis Screening and Management
- National Early Warning Score (NEWS)
- Morphine Milligram Equivalents
- AKI Screening
- Acute Hypoglycemia Management

Emergency

- Sepsis Screening and Management
- Modified Early Warning Score
- National Early Warning Score (NEWS)
- Stroke Door-to-Needle time
- Emergency Stroke Timers

Neurology

- Traumatic Brain Injury (TBI) Management
- Pressure Reactivity Index (PRx)
- Stroke Door-to-Needle Timer

AIRSTRIP®

AirStrip® provides clinical surveillance, decision support, and alarm management technology solutions for hospitals and health systems to help maximize clinician efficiencies, reduce burnout, increase retention and satisfaction, and improve patient safety. More than 700 hospitals have chosen AirStrip to support digital transformation initiatives.

Learn how AirStrip can help your clinicians diagnose earlier than ever before, accelerate life-saving interventions, reduce the cost of care, and save lives. Visit www.airstrip.com to learn more.
